

Siddharth S

DevOps & Platform Engineer · AWS · Amazon EKS · Kubernetes · CI/CD

Chennai, India (open to Bangalore) · siddharthp10@gmail.com · linkedin.com/in/siddharthp10 · github.com/siddharthp10

SUMMARY

DevOps and platform engineer with about five years of experience building and running production AWS and Kubernetes platforms, and automating the work around them so teams release more often and recover faster. Led the migration of 15 microservices to Amazon EKS, moved our repositories from Jenkins to GitHub Actions, and cut cloud spend by about 40%. Certified Kubernetes Administrator and AWS Certified Solutions Architect – Associate.

EXPERIENCE

Incedo Inc · Chennai, India Aug 2021 – Present

Platform Automation Sep 2025 – Present

- Platform automation across Amazon EKS operations, access management and deployments.

DevOps Engineer Aug 2021 – Aug 2025

- Led the migration of 15 microservices (120+ pods) to Amazon EKS; standardised Docker builds and pipelines cut deploy time from about 45 minutes to under 10.
- Automated Kustomize-based deployments on EKS, including environment-specific blue-green overlays.
- Moved repositories from Jenkins to GitHub Actions, making pipelines 68% shorter and supporting 15–20 production releases a week.
- Lowered cloud spend by about 40% through Savings Plans, rightsizing, autoscaling and S3 Intelligent-Tiering.
- Cut incidents by 30% and mean time to recovery by 45% with CloudWatch and New Relic dashboards, alerting and on-call runbooks.
- Managed AWS infrastructure as code with CloudFormation, integrated into CI/CD.
- Built an AI pull-request validation bot that checks PRs against team standards: hackathon runner-up, adopted by about 150 developers, saving 15+ minutes per PR.

PERSONAL PROJECTS

Terraform EKS Platform (in progress) github.com/siddharthp10/terraform-eks-platform

- An EKS platform built entirely in Terraform: S3 remote state with native locking, a multi-AZ VPC, and EKS on managed nodes with IRSA and access entries.
- Designed for plan-on-PR CI through GitHub OIDC (no stored AWS keys), Trivy scanning set to fail on high-severity findings, approval-gated apply, and Flux GitOps delivery.

PR Guardian Action (in progress, release candidate) github.com/siddharthp10/pr-guardian-action

- A GitHub Action designed to review infrastructure pull requests with a rules engine and post inline review comments; an optional AI layer is advisory only and never affects pass/fail.

SKILLS

Cloud and IaC	AWS (EKS, EC2, S3, EFS, VPC, IAM, KMS, Secrets Manager, CloudWatch, Route 53), CloudFormation, Terraform (personal projects)
Containers	Kubernetes, Amazon EKS, Docker, Helm, Kustomize, Flux, GitOps, RBAC, HPA/VPA, Amazon ECR
CI/CD	Jenkins, GitHub Actions, Bitbucket, Gradle, Maven, blue-green and canary deployments, FinOps
Observability	New Relic, Elastic, CloudWatch, SRE practices, incident and on-call management
AI-assisted automation	MCP servers, GitHub Copilot agent mode, Claude, custom agents
Languages and tooling	Python, Bash, Linux, Git, YAML, DevSecOps

CERTIFICATIONS

Certified Kubernetes Administrator (CKA), The Linux Foundation · valid to December 2027

AWS Certified Solutions Architect – Associate, Amazon Web Services

EDUCATION

B.Tech, Electrical, Electronics and Communications Engineering · SRM University of Science and Technology, Chennai · 2017 – 2021
